BOATING REGISTRATION STATISTICS

1985

INTRODUCTION

In 1985, 9,583,673 recreational boats were registered by the states and U.S. territories The length of each state's registration period varies from one to three years, respectively.

All states register motorboats and auxiliary powered sailboats. Some states register non-powered sailboats over a specified length, while other states register all types of watercraft. Sailboats and houseboats are included in either the inboard or outboard propulsion categories, depending on whether they are propelled by an inboard engine or an outboard motor. All inboard/outdrive boats are included in the inboard propulsion category.

In 1984, the Coast Guard began a five year phase-in period to change reporting categories for length and hull classifications. The differences between the existing categories and the new categories are as follows: the existing 40 to 65 Feet, and the Over 65 Feet, categories will be combined into a single 40 Feet & Over category. The existing 16 Feet to Less Than 26 Feet category, and the 26 Feet to Less Than 40 Feet category, will be replaced by a 16 Feet to Less Than 20 Feet category and a 20 Feet to Less Than 40 Feet category. Steel and Aluminum hull categories will be replaced by a single Metal category. An Inflatable hull category will also be added.

Beginning in 1984 the states had the option of filing under either the old categories or the new categories, as individual states began implementing the new system. For purposes of this report the old categories were used. Where states reported using the new categories, their data was redistributed to the old categories using an estimate based upon prior years' distributions. Those states whose data was redistributed are indicated (Detail Estimated). Some states submitting incomplete data were also treated in this manner.
